

# Surface Pen

Fact Sheet  
Feb 2022

The new Surface Pro<sup>1</sup> provides people with the most responsive and natural digital inking experience thanks to the new Surface Pen. Writing and drawing on your new Surface Pro with the new Surface Pen feels like writing or drawing on paper, with features such as tilt for shading, increased pressure sensitivity levels and faster inking. The new Surface Pen not only helps you express your thoughts, ideas and drawings on screen, it reflects your personal style with four new color choices.

## Top Features and Benefits

- **Most accurate inking.** The new Surface Pen has been revolutionized to deliver the fastest, most fluid and accurate digital inking experience we have ever created. We've made it more sensitive by quadrupling the levels of pressure sensitivity to 4,096 and reducing the activation force, making inking easier and more natural. Tilt the pen just like a graphite pencil to shade your sketches, using one of three different tips.<sup>2</sup> Experience tilt, low-latency inking and improved pressure sensitivity for better note taking in Microsoft Office 365, designed to work best with the new Surface Pen on Surface Pro.
- **Surface Pro and Surface Pen, optimized.** The new Surface Pen is designed to shine on the new Surface Pro. Custom silicon in both the pen and device helps drive instant, fluid and accurate inking, so no matter how quickly you're writing or drawing, the ink flows from the tip of your pen to your screen. The new Surface Pen more than doubles the accuracy of the previous version, and with latency so low it is virtually imperceptible to the human eye, making it twice as responsive as the Apple Pencil.<sup>3</sup> And the new Surface Pro's hinge now extends to a full 165 degrees for full Studio Mode, so you can immerse yourself in your writing and drawing with the new Surface Pen.
- **Beauty and style.** Not only does the new Surface Pen provide an exceptional digital inking experience, it looks and feels like a real pen, and complements your personal style. Choose from four colors<sup>4</sup> — Platinum, Black, Burgundy and Cobalt Blue — that coordinate with the Surface Pro Signature Type Cover<sup>1</sup> and Surface Arc Mouse.<sup>1</sup>
- **The best of Microsoft hardware and software.** The new Surface Pro ships with Windows 10 Creators Update and is fully compatible with the programs you need to be productive. Microsoft Office 365 subscribers will be able to take advantage of the new Surface Pen's tilt support, low-

latency inking, and improved pressure sensitivity for better note taking, comment writing, drawing and more when using the new Surface Pen in Office apps on the new Surface Pro. Now you can work, connect and create even more in the most widely used productivity suite.

## Technical Specifications

Weight	0.04 lbs. (20 g)
Compatibility <sup>2</sup>	Surface Studio 1/2 Surface Laptop 1/2/3/4 Surface Book 1/2/3 Surface Pro Surface Pro X Surface Pro 3/4/5/6/7/7+/8 Surface 3 Surface Go 1/2/3 Surface Duo 1/2 Surface Laptop Studio Pen Tip Kit
Dimensions	Length: 146.1mm Diameter: 9.5mm (9.7mm to flat edge)
Available Colors <sup>4</sup>	Platinum, Black, Burgundy, Cobalt Blue
Connection	Bluetooth <sup>®</sup> low energy-compatible 4.0, 4.1
Buttons	Right click Tail button: Erase, configurable functionality
Battery	1 AAAA (installed in the Surface Pen) Up to one-year battery life
In the Box	Surface Pen with HB tip installed Battery (installed in the pen)
Warranty	One-year limited hardware warranty <sup>5</sup>

<sup>1</sup> Sold separately

<sup>2</sup> Surface Pen tilt functionality is currently available with the new Surface Pro.

<sup>3</sup> Microsoft Test Lab, test of average ink latency, April 2017.

<sup>4</sup> Colors vary by market.

<sup>5</sup> U.S. only; varies by market.
